One of the valuable benefits of using the new online floor plan for the Expo - is that it enables the public to view who is Exhibiting and plan their day out weeks ahead of the event.

Visitors can search by the industry sector that they are interested in - and the floorplan will highlight all the booths of the Exhibitors in that sector.

Visitors click on each booth to see the Exhibitor's business profile to plan their day.

Please take the time to add your business information to your online profile, it is a powerful marketing tool for you to use for the Expo.
